

## Integrating Mobile Devices with Tactical Radios

GvTether™ is a rugged, lightweight, and portable tethering device that enhances situational awareness (SA) by allowing the use of Android mobile devices in a secure, tactical environment. GvTether™ connects a tactical network radio and an Android device and enables real-time routing of Full Motion Video (FMV) and messaging (e.g., Cursor-on-Target).

- Supports bidirectional transmission of messages - including SA receive mode for legacy radios
- Supports FMV routing with or without geospatial metadata
- Backwards compatible with legacy radios; contains support for next generation IP radios
- Integrates with stock Android devices capable of USB tethering
- Low wattage device; powered through existing tactical radios and batteries
- Small form factor of 3.1" x 2.0" x 1.0" - Weight: 5oz
